

*Is your church a safe place for adults, children, volunteers...
for everyone who enters?*

Risk Management For Churches

*A Ministry of the
American Baptist Churches
of the Central Region*

Since we live in a different time and culture, it is important for us to be absolutely certain that every aspect of our church life is safe for all people who are related to our church.

For almost two decades churches have been given notice that they are liable in many ways for the things they do — and the things they don't do.

Areas of concern include: insurance, facilities, personnel, programs, legal requirements — among others. And yet, many congregations continue to ignore the warnings.

If your congregation has not extensively studied and prepared for these issues, it is leaving itself open for litigation and other problems.

We strongly recommend that you begin this process by contacting Beverly Fink for more details, cost, and to schedule a workshop for your cluster/area.

PROVIDING A SAFE ENVIRONMENT

Your church has an obligation to make
Facilities
Programs
Staff

as safe as they can be.

This **WORKSHOP** will help your church answer the question:

“Are we providing

A

SAFE

ENVIRONMENT?”

Presenter: Mrs. Beverly Fink
